Comments

- April-May boom is related both to the publication of the Incoming News section and to the link from the Crop Biotech website news section.
- Visits coming from search engines (red) increased during last 8 months of about 35%. Search engine optimization worked. May peak may be a consequence of the increased popularity due to the link from Crop Biotech.
- February direct visits increased because of Vilnius Course announcement publication (24 Jan).
- During the last months, growing visits from search engines are contrasting the decreasing visits from other sources, i.e. Direct and Referrals.
- Summer usually brings visits to websites to drop. Biotethed website does not make exception.
